## FEATURES

---

The Blubay 100' catamaran is the world's most luxurious superyacht and has recently been launched near Cannes, France. She is one of the fastest all carbon sail catamarans and not only offers a high level of comfort but also ultimate safety and ease of handling. Unlike most large catamarans, the Blubay 100' sports fully retractable daggerboards, which allow access to even the most shallow anchorages. Daggerboards provide the ultimate safety and performance.

This offer is for a custom project build slot as ALLURE'S sistership. Construction at the Yacht Industries shipyard in France would take approx. 1.5 years.

The Blubay 100' has an exceptional styling with modern and elegant lines, which are perfectly integrated with her interior volume. She is a superb yacht, elegant and refined, made for fast cruising with one's friends and family. She is sporty yet simple to sail and represents the ideal means of living in communion with the sea, while fully enjoying the luxury and comfort of an exceptional vessel.

---
